Q: How to use modulus and modulus if checks for even and odd from date field
How to use modulus and modulus if checks for even and odd from date field in MySQL?
SELECT * FROM `admin_notes` WHERE `category` = 'appointments' AND `client` = '100' AND `campaign_id` = '1' AND `f_date` % 2 = 0 AND `f_date` >='20100107' AND `f_date` <='20100701'
Date field f_date 20100107 20100113 20100701 20100702
In above the code, when the f_date is an odd number it doesn't give the result. In that f_date it gives the value what should be correct. In this f_date should not give the value what should be correct. A: f_date should be stored as type DATE: ALTER TABLE `admin_notes` CHANGE COLUMN `f_date` `f_date` DATE NOT NULL
And use the correct operator: AND f_date % 2 = 0 Instead of AND f_date % 2 = 0 AND f_date >='20100107'

Description The economy of Cornwall is closely tied to the global
fishing industry, and today UK fisheries account for around 40%
of Cornwall's total exports. The tourism industry and the food
industry also play a large part. The location of Cornwall is ideal
for holiday makers as it is very close to the UK and Europe. The
county of Cornwall has limited public transport routes, and this is
especially true of the smaller towns. It is well worth hiring a car or
a bike to visit the many beautiful countryside areas, and explore
the historic towns. Population Statistics Demography The
