Crucc 2.4 Car Radio Universal Code Calculator.zip psychologie beamer b CRUCC 2.0 includesÂ .Q: What is the difference between a record and attribute? Hi, I was confused while reading the book The Well Grounded Rubyist. Could someone explain what the difference between a record and attribute is? A: The difference is that a constant in Ruby is associated with a class. Example: class Example DUMMY = :dummy end class OtherExample DUMMY = :dummy end The difference is that a constant in Ruby is associated with a class. Example: class Example DUMMY = :dummy end class OtherExample DUMMY = :dummy end Attribute can be associated with a method, class or an instance. Example class Example def dummy DUMMY end end class OtherExample def dummy DUMMY end end attr_accessor :dummy a = Example.new a.dummy = :dummy puts a.dummy # output: :dummy # is equal to Example.new.dummy #=> :dummy A: An attribute is associated with a class, or an instance of that class. It affects the attributes the object has. A record is not associated with a class, and an attribute can be associated with one of the following: An attribute can only be associated with a method. These are called accessors. They enable e79caf774b
